THOMAS PRAYON

Web Developer

ABOUT ME

Web developer with a meticulous eye and passion for problem solving, whether in the digital realm or in real-life bouldering or rock-climbing. Creative with a diverse bunch of experiences from marketing and design to operations, and even tattooing. Bringing organisational and problem solving skills + a bunch of enthusiasm for learning (and developing) new technologies.

WEB DEVELOPMENT PROJECTS

Cinematix

Personal project, Career Foundry, September - October 2023

● Created a single-page, responsive front-end application using React following the MVC design pattern.
● Built a REST API woth Node.js with Express
● Created a non-relational database using MongoDB using Moongose.
● Tested API endpoints with Postman.
● Created a well written documentation and deployed the API.
● Users can learn more about the movies they like, creating an account and save/remove their favorite movies.
